Unit 3  
Edgewater Park, NJ 08010

**Re:** Right of Entry

By signing below I \_\_\_\_\_, grant  
**Hydroscience, Inc.**, (HI) or their agent, permission to enter the premises known  
as \_\_\_\_\_ to perform hand  
auger soil boring columns to determine the extent of contamination caused by  
the previously removed underground storage tank located on the adjoining  
property known as \_\_\_\_\_.

By signing this Right of Entry, you are stating that you will hold harmless,  
**Hydroscience, Inc.** or their agent, and the person or persons requesting this  
investigation, from any liability that may arise from the findings, including but not  
limited to subterranean structures, pipes, tanks, lines, cabling, etc., on site  
unless these have been called to the explicit attention of HI and correctly shown  
on plans furnished by "Client" in connection with the work performed under  
relevant Agreement. In the event underground utilities become damaged during  
remedial procedures, the cost to repair will be covered by the homeowner's  
insurance company of the adjoining property.

I also represent that I am authorized to grant such permission.

Permission granted:
